DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 5 and 6 are rejected because the claimed invention is directed to non-statutory subject matter.

Claims 5 and 6 recite non-functional data structure which is inoperative and therefore lacks utility. Claim 5 recites "a communication protocol" which is interpreted as software code. However, there is no other element recited in cooperation with the protocol which would impart any functionality. Accordingly these claims are directed to a non-functional data structure (such as for example digital data representing video or music files recorded on a CD or a DVD) lacking any utility and therefore rejected as non-statutory subject matter.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claims 1-6 rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

6. Claims 1-6 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The structure which goes to make up the device must be clearly and positively specified. The process steps must be organized and correlated in such a manner as to present a complete operative method or apparatus. Furthermore, The claim(s) must be written in a format that conforms to the format adopted for the US patent applications as set forth in the following paragraphs.

In support of this contention, the examiner cites the following requirement of 37 CFR 1.75 regarding claim structure.

Where the nature of the case admits, as in the case of an improvement, any independent claim should contain in the following order, (1) a preamble comprising a general description of all the elements or steps of the claimed combination which are conventional or known, (2) a phrase such as "wherein the improvement comprises," and (3) those elements, steps and/or relationships which constitute that portion of the claimed combination which the applicant considers as the new or improved portion.

The claims are further examined as best interpreted from the defective recitation with "broadest reasonable interpretation".

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Patterson Jr. et al. (US 5,774,877). (hereafter '877 Patent)

As per claims 1-2, the '877 patent discloses a system and a system for a security on the floor. (see entire disclosure).

As per claims 3-4, the '877 patent discloses a system and a method for communicating between a handheld device and a trading system (see entire disclosure).

As per claims 5-6, the '877 patent discloses a communication protocol (and a computer readable medium) for use in passing messages between a hand trading device and a handheld server system connected to a trading system

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
